

I am opposed to the Low Power FM stations taking priority over current FM stations. We have listened to K-LOVE for several years now and it has been quite a blessing to our family. There are no other radio stations in our area that serve us like K-LOVE does. Our community has definitely been blessed by this radio station. The funding that K-LOVE receives from our community should be proof enough that there is a need for this particular radio station. The community can only be blessed and helped by continuing to broadcast positive and up-lifting music.
